Major General L. C. Craigie

1. Confirming the recent conversation of the undersigned with Major General L. C. Craigie, 9 December 1947, attached as listed below are copies of the reports from this Headquarters concerning Flying Discs.

2. Comments of Headquarters, Air Force on these letters have never been received by this Command. Continued and recent reports from qualified observers concerning this phenomenon still makes this matter one of concern to Headquarters, Air Materiel Command. Intelligence Department of this Command is continuing the collection and analysis of all available reports.

SUBJECT: Flying Discs

TO: Commanding General
Air Materiel Command
Wright Field, Dayton, Ohio
Attn: TSDIN

1. Reference is made to three inclosures, memoranda from your office to this headquarters, subject as above.

2. It is Air Force policy not to ignore reports of sightings and phenomena in the atmosphere but to recognize that part of its mission is to collect, collate, evaluate and act on information of this nature.

3. In implementing this policy, it is desired that the Air Materiel Command set up a project whose purpose is to collect, collate, evaluate and distribute to interested government agencies and contractors all information concerning sightings and phenomena in the atmosphere which can be construed to be of concern to the national security. It is desired that appropriate recommendations be forwarded to this Headquarters, wherever action is indicated which falls outside the field of the Air Materiel Command.

4. It is suggested that the activities of this project include the preparation and distribution of an initial report, as recommended in Inclosure 1, and that subsequent reports be issued on a quarterly basis. Supplementary reports should be issued at more frequent intervals should the need for same be indicated. This project is assigned priority 2A, with a security classification of "restricted" and Code Name of "SIGN". Where data of a classification higher than restricted is handled by the project such data should be classified accordingly. A complete interchange of data should be effected as recommended in Inclosure 1.

DEC 5 1947

12-131

SUBJECT: Flying Disc.

TO: Chief of Staff
United States Air Force
Washington 25, D. C.
ATTN: Director of Intelligence

X 201-1000

1. The attached photographs were forwarded to this office by a very reliable source of information, obtained from a Mary L. Herren, 1728 S. W. Bidwell Avenue, Portland 2, Oregon. She advises these photographs were taken some time between November 5th and 12th, 1946, in the vicinity of Jefferson, Oregon, and points out the formation in the photographs as being objects she did not recall seeing herself but she thought might possibly be flying discs.

2. The objects referred to appear in the sky area of each accompanying photograph. The uniformity of the markings would tend to indicate that the camera or film used to take these pictures was possibly defective. No incidents of flying discs have been reported from that vicinity on or about the inclusive dates named above.

3. Mrs. Herren has requested the return of the negatives. If desired, this office will obtain the negatives and forward them at your request.

SUBJECT: Flying Discs

TO: Chief of Staff
United States Air Force
Washington 25, D. C.
ATTENTION: Office, Director of Intelligence
Lt Colonel George Garrett, Jr.

1. The inclosed newspaper clippings are submitted for your information and comment. The incident reported in Seattle appeared in the "Dayton Journal" on 12 November 1947, and should be followed up if possible.

2. The story by Lionel Shapiro regarding war weapons developed in Spain evidently was printed in a number of leading newspapers throughout the country. The significance of this article will be dependent upon certain essential elements for such alleged important developments, such as funds, materials, experimental testing facilities, and technological "know-how". The latter is supposed to be supplied by German scientists. The German scientists at this Hq indicate that no important scientists from Germany are working in Spain, and those mentioned in this article are not known to them.

3. If possible, therefore, an effort should be made to obtain names, qualifications, or any information that might help to identify the alleged German scientists working in Spain.

4. A brief statement was made in a recent intelligence report from Hq, USAF, AC/AS-2, regarding a flying disc incident in Alaska in September. The close range sighting reported should render a more detailed observation than what was reported, which also suggests a follow-up.

5. It is further requested that this office be advised as to progress being made on the plotting of all flying disc incidents to date, particularly in North America. It was understood that Dr. Carroll was going to plot these incidents, but no further word was received regarding this effort.

SEP 28 1947

SUBJECT: AMC Opinion Concerning "Flying Discs"

TO: Commanding General
Army Air Forces
Washington 25, D. C.
ATTENTION: Brig. General George Schulgen
AC/AS-2

1. As requested by AC/AS-2 there is presented below the considered opinion of this Command concerning the so-called "Flying Discs". This opinion is based on interrogation report data furnished by AC/AS-2 and preliminary studies by personnel of T-2 and Aircraft Laboratory, Engineering Division T-3. This opinion was arrived at in a conference between personnel from the Air Institute of Technology, Intelligence T-2, Office, Chief of Engineering Division, and the Aircraft, Power Plant and Propeller Laboratories of Engineering Division T-3.

2. It is the opinion that:

a. The phenomenon reported is something real and not visionary or fictitious.

b. There are objects probably approximating the shape of a disc, of such appreciable size as to appear to be as large as man-made aircraft.

c. There is a possibility that some of the incidents may be caused by natural phenomena, such as meteors.

d. The reported operating characteristics such as extreme rates of climb, maneuverability (particularly in roll), and action which must be considered evasive when sighted or contacted by friendly aircraft and radar, lend belief to the possibility that some of the objects are controlled either manually, automatically or remotely.

e. The apparent common description of the objects is as follows:-

(1) Metallic or light reflecting surface.

U-39552

Incl #2
SECRET

Basic Ltr fr CG, AMC, WF to CG, AAF, Wash. D. C. subj "AMC Opinion Concerning "Flying Discs".

- (2) Absence of trail, except in a few instances when the object apparently was operating under high performance conditions.
- (3) Circular or elliptical in shape, flat on bottom and domed on top.
- (4) Several reports of well kept formation flights varying from three to nine objects.
- (5) Normally no associated sound, except in three instances a substantial rumbling roar was noted.
- (6) Level flight speeds normally above 300 knots are estimated.

f. It is possible within the present U. S. knowledge -- provided extensive detailed development is undertaken -- to construct a piloted aircraft which has the general description of the object in subparagraph (e) above which would be capable of an approximate range of 7000 miles at subsonic speeds.

g. Any developments in this country along the lines indicated would be extremely expensive, time consuming and at the considerable expense of current projects and therefore, if directed, should be set up independently of existing projects.

h. Due consideration must be given the following:-

- (1) The possibility that these objects are of domestic origin - the product of some high security project not known to AC/AS-2 or this Command.
- (2) The lack of physical evidence in the shape of crash recovered exhibits which would undeniably prove the existence of these objects.
- (3) The possibility that some foreign nation has a form of propulsion possibly nuclear, which is outside of our domestic knowledge.

3. It is recommended that:-

a. Headquarters, Army Air Forces issue a directive assigning a priority, security classification and Code Name for a detailed study of this matter to include the preparation of complete sets of all available and pertinent data which will then be made available to the Army, Navy, Atomic Energy Commission, JRDB, the Air Force Scientific Advisory Group, NACA, and the RAND and NEPA projects for comments and recommendations, with a preliminary report to be forwarded within 15 days of receipt of the data and a detailed report thereafter every 30 days as the investi-

TO: Commanding Officer
Operating Location No. 16 of
731st AAFBU (101st AACB Sq)
Kirtland Field
Albuquerque, New Mexico
ATTN: Col. Howard G. Bunker

1. General Brentnall, during a recent visit at Las Vegas, was contacted by a Mrs. Madeline Gwynne Merchant, Sante Fe, New Mexico, who described what may be termed a novel theory concerning "Flying Discs".

2. According to her theory, "Flying Discs" are being fired from a locality in Central Mexico from a laboratory which is being operated by the Russians. She claims they are being aimed at the United States for the purpose of sighting in on important atomic energy and aircraft installations.

3. General Brentnall states that he does not have any further interest in an interrogation of Mrs. Merchant since it is not an engineering matter. However, he recommends that if Hq, Air Materiel Command, T-2, wishes to sponsor an interrogation of this nature that Col. Howard Bunker should be contacted to determine the name and address of the colonel at Las Vegas who has knowledge of this case. In view of General Brentnall's suggestion, no direct contact will be made with Mrs. Merchant.

4. It is requested, therefore, that the name and address of the above mentioned colonel be made available to this office as soon as possible so that further action, as deemed advisable, can be taken.

"Flying Saucers"

Commanding General, Army Air Force, Washington 25, O.C.
ATTN: AC/AS-2, Lt Col Garrett

x 000.9 - Japan

It is requested that this office be furnished all available information concerning an alleged "Flying Saucer" flight sighting made by a radar station in Japan. This incident was mentioned by Dr. Charles Carroll during a conference in Brig Gen Schulgen's office attended by Mr. A.C. Loedding, T-2 representative, on 5 September 1947.

SUBJECT: Reported Sightings of Flying Discs.

TO : Commanding General
Air Materiel Command
Wright Field, Dayton, Ohio
Attention: T-2.

1. As arranged verbally with Mr. Loedding, inclosed is the complete file maintained by this Office on reported sightings of Flying Discs.
2. This file is forwarded so that photostats may be made in order to provide your Command with a duplicate set of these sightings.
3. When photostating this material for your purpose, it will be appreciated if one extra set is made for this Office and returned at the same time the originals are returned.
4. This file, and the duplicates, should be returned as soon as possible to this Headquarters, Attention: AC/AS-2, Air Intelligence Requirements Division, Collection Branch.

COMMENT No. 1
Lt Col Garrett/nc/4544

1. From a detailed study of certain reported observations on the flying saucers, selected for their veracity and reliability, it is apparent that several aspects of their appearance have a common pattern.
2. Before pursuing its investigation of these objects any further, this Office requests assurance that no research project of the Army Air Forces, at present being test-flown, has the following characteristics and that it may therefore be assumed the recent flying saucer "mystery" is not of United States origin:
 - a. Surface is metallic - indicating a metallic skin, at least.
 - b. When a trail is observed, it is a lightly colored blue-brown haze, similar to a rocket engine's exhaust. Contrary to a rocket of the solid type, one observation indicates that the fuel may be throttled, which would indicate a liquid rocket engine.
 - c. As to shape, all observations state that the object is circular, or at least elliptical, flat on the bottom and slightly domed on the top.
 - d. Size estimates place it somewhere near the size of a C-54 or Constellation as they would appear while flying at 10,000'.
 - e. Some reports describe two tabs located at the rear and symmetrical about the axis of flight motion.
 - f. Flights have been reported containing from three to nine objects, flying good formation on each other, with speeds always above 300 knots.
 - g. The discs oscillate laterally while flying along, which could be snaking.
